Game sequence

11th Edition

Pre-game

- 1. Muster armies: Force Disposition = Take and Hold. Lion El'Jonson must be your Warlord
- 2. Determine mission (from both players' dispositions)
- 3. Determine deployment map
- 4. (Optional) Twist
- 5. Create the battlefield
- 6. Deploy and finish pre-game, in your mission pack's order:
- ↳ Decide reserves: Lion (Deep Strike); Belial + Knights (Deep Strike, or Strategic Reserves to use the Teleport Homer)
- ↳ Embark: Rhinos carry up to 12 non-Terminator infantry each (see Rhino card)
- ↳ Before the battle: place Belial's Teleport Homer token

Each turn

- Start of battle round: +1 CP (Lion's Transhuman Strategist)
- 1. Start of turn step
- 2. Command: +1 CP each → pick combat doctrine; Lion picks 2 Primarch abilities + Master Strategist → Battle-shock step
- 3. Movement: Azrael names a unit + doctrine; Techmarine blesses a vehicle → then reinforcements
- 4. Shooting (cover = -1 BS; Bolter Discipline near objectives)
- 5. Charge (chargers get Fights First until end of turn)
- 6. Fight: Fights First (Lion always), then the rest, alternating
- 7. End of turn: non-mission rules, then mission scoring

Planning rules

- One stratagem per unit per phase
- Each doctrine once per battle (Assault twice): only 4 doctrine picks in total
- A unit has only one doctrine at a time, except the Lion (Master Strategist adds one on top)
- Deep Strike: >8" from enemies. Rapid Ingress: not in battle round 1
- Ingress: wholly within 6" of an edge, >8" from enemies; not in enemy deployment zone before round 3

Steps from the 11th Edition core rules; follow your mission pack where noted.

Game plan

Take and Hold

Hold the middle with tough, hard-to-wound infantry, kill the enemy units that contest it with the Lion and Deathwing, and time your four doctrine picks for the turns you charge.

Deployment

- Intercessors (OC 10 each) on home objectives: Bolter Discipline gives them +1 to hit while an objective is in range anyway.
- Gladiator Lancer and Ballistus on long firing lanes; Techmarine within 3" of one of them (Lone Operative there, and the Blessing next Movement).
- Rhino A: Azrael + Companions (7). Rhino B: Hellblasters + Ezekiel (6), or an Intercessor squad. Rhinos can't carry the Knights (Terminators).
- Lion: deploy within 3" of a Dark Angels infantry unit for Lone Operative, or keep him in Deep Strike.
- Belial's Teleport Homer goes in midfield cover where enemies won't walk within 1" of it.

Scoring

- Biggest OC: Azrael's unit 13, Intercessors 10 each, Belial's unit 6, Hellblasters 5, Lion and Ballistus 4 each.
- Lion's Will (1CP, either Command phase): +1 OC on a unit already on an objective. In Sacrifice, Victory (1CP): when a Deathwing unit dies on an objective, keep it secured.
- Doctrine timing: you get Assault twice, then Devastator and Tactical once each. Save Assault for the rounds you charge onto the midfield.
- Intercessors are your action-doers: Tactical Mainstay lets them act while engaged or battle-shocked and still shoot.
- Save Insane Bravery (once per battle) for Azrael's unit or an Intercessor squad holding a key objective.

Matchups

Your mission vs theirs

Opponent picks	You play	They play	Watch for
Take and Hold	Battlefield Dominance	Battlefield Dominance	Mirror: you both want objectives. Save Assault doctrine for the turn you charge onto theirs.
Purge the Foe	Immovable Object	Unstoppable Force	They want kills: Ezekiel and the Techmarine are easy ones; keep them in Rhinos or behind units.
Disruption	Determined Acquisition	Death Trap	They'll work in your territory: keep an Intercessor squad home; Tactical Mainstay lets it act while engaged.
Reconnaissance	Purge and Secure	Reconnaissance Sweep	They'll spread thin: Lancer (72") and Ballistus pick off lone scouts; Mist-wreathed sends the Lion after far ones.
Priority Assets	Inescapable Dominion	Secure Asset	They'll commit to key points: Belial's Teleport Homer drop or the Lion lands on whatever they commit.

Each player plays the mission from their own disposition's row. Mission names from the 11th Edition disposition matrix; scoring is on the mission card.

Dark Angels — Turn Cheat Sheet

Wrath of the Rock + Assault Brethren · 2000/2000 pts · Take and Hold

Don't forget

Before the battle: Lion is Warlord; place the Teleport Homer; declare reserves; embark Rhinos

Start of each battle round: +1 CP from the Lion (Transhuman Strategist)

Start of your Command phase: Pick a combat doctrine (Assault ×2, Devastator ×1, Tactical ×1 for the whole game) · Lion: pick 2 Primarch abilities; Master Strategist gives him a second doctrine · Strat: Lion's Will (+1 OC) or Tactical Mastery (Deathwing unit's own doctrine)

Your Movement phase: Azrael: name a unit within 9" and a doctrine (before that unit moves) · Techmarine: Blessing on a vehicle within 3" (heal D3, ignore modifiers)

Your Shooting phase: Intercessors: +1 to hit if an objective is in range of them or the target · Strat: Relics of the Dark Age (+2 S) on Hellblasters

Opponent's turn: Start of their Shooting: Smokescreen on a Rhino (-1 CP) or the Lancer · End of their Movement (round 2+): Rapid Ingress + Teleport Homer for Belial's unit (0 CP) · Ezekiel targeted: Whispers of the Shadow Forest (-1 to hit him)

Before the battle

- Lion — must be your Warlord (Supreme Commander)
- Belial + Knights — place one Teleport Homer token anywhere (once per battle)
- Lion, Belial + Knights — may start in Deep Strike reserves

Start of each battle round

- Lion (Warlord) — Transhuman Strategist: gain 1 CP

Command phase

- Army — pick one combat doctrine for every unit: Assault (charge after Advancing), Devastator (ranged weapons get Assault), Tactical (shoot and charge after Falling Back)
- Lion — pick 2 of: Mist-wreathed Shadow Realms (go to Strategic Reserves, ingress this turn's Movement, even round 1), Martial Exemplar (6" aura: melee re-roll hit and wound 1s), No Hiding From the Watchers (6" aura: FNP 5+ vs psychic and mortal wounds)
- Lion — Master Strategist: one extra doctrine for him only, on top of the army's
- Strat: Tactical Mastery (1CP) — a Deathwing unit gets its own doctrine until your next Command phase
- Strat: Lion's Will (1CP, either turn) — unit in range of an objective gets +1 OC until end of turn
- Strat: Insane Bravery (1CP) — auto-pass a Battle-shock test (once per battle)

Movement phase

- Azrael — Masterful Tactician: name one Adeptus Astartes unit within 9" he can see and a doctrine; it replaces that unit's doctrine until your next Command phase
- Techmarine — start or end of his move: a vehicle within 3" heals D3 and can ignore hit/wound modifiers until your next Movement phase
- Lion — ingress move if he used Mist-wreathed Shadow Realms
- Reinforcements — Deep Strike >8" from enemies

Shooting phase

- Intercessors — Bolter Discipline: +1 to hit if an objective is in range of them or of the target
- Ballistus — Sustained Hits 1 vs targets within 24"
- Gladiator Lancer — vs Monsters/Vehicles: re-roll one hit, one wound and one damage roll
- Ezekiel — Engulfing Fear (psychic level 1): roll D6 (1 = he's battle-shocked), then an enemy within 12" takes a Battle-shock test at -1
- Rhinos — Firing Deck 2: two passengers shoot with the Rhino's storm bolter
- Strat: Relics of the Dark Age (1CP) — an infantry unit's ranged attacks get +2 S
- Strat: Explosives (1CP) — Explosives unit, enemy within 8": six D6, each 4+ = 1 mortal wound

Charge phase

- Assault doctrine — units that Advanced can still charge
- Strat: Crushing Impact (1CP) — Lion, Ballistus or Lancer after a charge: roll D6 equal to its T, 5+ = MW to enemy (max 6), 1s hurt you

Fight phase

- Lion — always Fights First
- Azrael's unit — +1 to hit vs Characters; Belial's unit — +1 to wound vs Characters
- Strat: Gene-wrought Might (1CP) — melee gets Lance, plus +1 AP if the unit has Assault doctrine
- Strat: Inescapable Justice (1CP) — melee gets Precision
- Strat: Duty in Death (1CP, when enemy targets your unit) — dying models stay to fight on 4+ (+1 with Assault doctrine)
- Belial — killed before his unit fights: 2+ and he still fights

Opponent's turn (reactive)

- Strat: Rapid Ingress (1CP; 0CP with Teleport Homer) — end of their Movement, not round 1; Belial's unit arrives within 3" of the token, >8" from enemies

- Strat: Fire Overwatch (1CP) — end of their Movement: snap-shoot, hit on 6s
- Strat: Smokescreen (1CP) — start of their Shooting: Rhino or Lancer gets cover; Rhinos -1 CP and ignore other uses
- Strat: Armour of Contempt (1CP) — when an enemy shoots/fights your unit: its attacks get 1 worse AP
- Ezekiel — Whispers of the Shadow Forest (psychic level 1): when targeted, D6 (1 = battle-shocked), attacks vs him -1 to hit this phase
- Strat: Heroic Intervention (1CP) — end of their Charge: unit within 12" charges (Ballistus qualifies: Walker)
- Strat: Counter-offensive (2CP) — their Fight phase: your unit fights next

Always on

- Dutiful Tenacity — attacks with Strength above your infantry's Toughness get -1 to wound
- Azrael's unit — Stealth; melee attacks vs them -1 to hit; 4+ invulnerable
- Deathwing Knights — every attack vs them has -1 Damage
- Lion — -1 to wound if S beats T10; FNP 4+ vs psychic and mortal wounds; Lone Operative within 3" of DA infantry
- Ezekiel — psyker level 3: psychic abilities used in a battle round add up to at most 3 levels
- Damaged 4 (Ballistus, Lancer) — -1 to hit at 1-4 wounds left; the Techmarine's Blessing cancels it
- One stratagem per unit per phase

Azrael + Inner Circle Companions

Midfield objective holder (OC 13) and character killer; Azrael also hands out doctrines.

`ALWAYS` Enmity for the Unworthy: +1 to hit vs Character units

`MOVE` Masterful Tactician: name one Astartes unit within 9" + a doctrine; replaces its doctrine until your next Command phase

`ONCE` Watcher in the Dark: first time the unit suffers a mortal wound, it gains FNP 4+ vs mortal wounds

`ALWAYS` 4+ invulnerable save (Lion Helm / Companions)

> **Don't forget:** Azrael's doctrine REPLACES the unit's current one (one doctrine per unit). Name it before that unit moves if it's Assault.

Check: Greatsword Sweep shows Sustained Hits 2 and 1: the 1 comes from Azrael, use the better (2). Check whether Azrael's pick counts as that doctrine's once-per-battle use, and whether Watcher in the Dark lasts the rest of the battle.

Belial + Deathwing Knights

355 pts

Deep Strike melee bricks that kill Characters and tanks; -1 Damage makes them very hard to kill.

Mace of Absolution ×4	Melee	4	2+	6	-2	2	Anti-Monster 4+, Anti-Vehicle 4+	Vehicles, monsters

ALWAYS Inner Circle: every attack vs this unit has -1 Damage (Tactical Dreadnought Fortitude can't target it)
ALWAYS Grand Master of the Deathwing: +1 to wound vs Character units
BEFORE Teleport Homer: place a token; with Rapid Ingress it costs 1 less CP, arrive within 3" of it and >8" from enemies
BEFORE Deep Strike: arrive >8" from enemies
FIGHT Strikes of Retribution: if Belial dies before his unit fights, on 2+ he stays and fights

Don't forget: The token is lost if an enemy ends a move within 1" of it. Rapid Ingress can't be used in battle round 1.

Check: Rapid Ingress needs the unit in Strategic Reserves; check whether Deep Strike reserves count, or put the unit in Strategic Reserves to use the token.

SHOOT Engulfing Fear (level 1): D6 (1 = Ezekiel battle-shocked), then an enemy within 12" tests Battle-shock at -1
REACT Whispers of the Shadow Forest (level 1): when targeted, D6 (1 = battle-shocked); attacks vs him -1 to hit this phase
ALWAYS Psyker level 3: abilities used per battle round add up to at most 3 levels
ALWAYS Psychic Hood: FNP 4+ vs psychic attacks and mortal wounds

Don't forget: Traitor's Bane A 5 already includes Book of Salvation's +1. Don't add it again.

Check: Ezekiel has no Leader attachment on this list, so he's a lone 5-wound Character. Keep him behind your units or in a Rhino. Mind Wipe's psychic level isn't printed.
