RULES AND STRATAGEMS

Prioritised Efficiency ARMY RULE
If LEAGUES OF VOTANN is your Army Faction, your LEAGUES OF VOTANN units have one of two abilities at any time (Hostile Acquisition or else Fortify Takeover), and your Yield points (YP) decide which one applies as the battle goes on:

- At the start of the battle, your units have Hostile Acquisition until the start of your next Command phase.
- At the end of your Command phase with fewer than 7YP: Hostile Acquisition until the start of your next Command phase.
- At the end of your Command phase with 7YP or more: Fortify Takeover until the start of your next Command phase.

Hostile Acquisition ARMY RULE
- This unit's models add 1 to Hit rolls for attacks against enemy units within range of an objective marker.
- Advance and Charge rolls for this unit can be re-rolled.

Fortify Takeover ARMY RULE
- While this unit is within range of an objective marker you control, its models add 1 to their Hit rolls.
- Attacks targeting this unit subtract 1 from their Wound roll if their Strength exceeds the unit's Toughness (unless this unit is a VEHICLE).

Yield Points ARMY RULE
At the end of each player's Command phase, an objective marker you control in your own deployment zone earns you 1YP. From battle round two onwards, each of these conditions you meet earns 1YP more:

- At least one objective marker outside your deployment zone is under your control.
- At least two objective markers outside your deployment zone are under your control.
- Your opponent controls fewer objective markers than you do.

During your turn, the YP from this rule arrive before you check which ability your LEAGUES OF VOTANN units have. A rule that spends YP takes that amount off your total (it can never drop below 0); without enough YP, the rule cannot be used.

Fury from the Dêlve DÊLVE ASSAULT SHIFT
